

Case Study

Brewing Company Pump Station Application in Indiana

Problem:

A wood shop brewery pump station, located next to tasting patio, had several complaints and odor related issues. Customer called in early August 2017 and said that the University of Indiana move in day is fast approaching and they need odor control ASAP.

Solution:

Based on the loadings below, Syneco recommended our Peacemaker 3x3 and delivered the unit by August 31st, 2017. With just 20 cubic feet of Converting/Polishing media our Peacemaker 3x3 will fully remove H₂S (Avg=54 PPM / Peak=396 PPM) and other malodors for over a year.

Result:

Peacemaker 3x3 was installed and is effectively eliminating odors and complaints have stopped.
